CONTENTS – Volume 16, No 1

Transverse segmentation of the Baram-Balabac Basin, NW Borneo: refining the model of Borneo’s tectonic evolution by A B Cullen

Style and age of deformation in the NW Persian Gulf by B Soleimany & F Sâbat

Relations between effective thickness, gas production and porosity in heterogeneous reservoirs: an example from the Molve Field, Croatian Pannonian Basin by T Malvić & J Velić

Petrophysical evaluation of gas-hydrate formations by P F Worthington

Hydrocarbon migration in the Porcupine Basin, offshore Ireland: evidence from fluid inclusion studies by J Conliffe, N F Blamey, M Feely, J Parnell, A G Ryder

Generating a capillary saturation-height function to predict hydrocarbon saturation using artificial neural networks by N Al-Bulushi, P R King, M J Blunt & M Kraaijveld
