

Petroleum Geoscience

The journal is abstracted and/or indexed in *Current Contents*, *Science Citation Index*, *GeoArchive*, *GeoRef*, *Geobase*, *Petroleum Abstracts*, *Geological Abstracts*, *Mineralogical Abstracts* and *Cambridge Scientific Abstracts*

Production Editor: S Oberst, Geological Society Publishing House, Bath
(e-mail: sally.oberst@geolsoc.org.uk)

Editor-in-Chief: P A F Christie, Schlumberger Cambridge Research, UK (e-mail: pafc1@slb.com)

Co-Editors: A J Fraser, Imperial College, London (e-mail: alastair.fraser@imperial.ac.uk)

J R Underhill, University of Edinburgh, UK (e-mail: jru@staffmail.ed.ac.uk) and

P F Worthington, Gaffney, Cline and Associates, Singapore (e-mail: pworthington@gaffney-cline.com)

To advertise in *Petroleum Geoscience* contact: Paul Turp
Tel: +44 (0)117 9232951; E-mail: paul.turp@societymediasales.co.uk
Society Media Sales Ltd, Suite 2.1, QC30, 30 Queen Charlotte Street, Bristol BS1 4HJ

CONTENTS – Volume 16, No 3

Thematic set: Stretching the crust and extending exploration frontiers

Guest editors: S I Fraser, M R Lentini & A J Fraser

Rifts renaissance: stretching the crust and extending exploration frontiers

S I Fraser, A J Fraser & M R Lentini 187

From microcontinents to extensional allochthons: witnesses of how continents rift and break apart?

G Péron-Pinvidic & G Manatschal 189

The opening of the central segment of the South Atlantic: symmetry and the extension discrepancy

T J Reston 199

Hyper-extended crust in the South Atlantic: in search of a model

P Unternehr, G Péron-Pinvidic, G Manatschal & E Sutra 207

Geodynamics of the central South Atlantic conjugate margins: implications for hydrocarbon potential

M R Lentini, S I Fraser, H S Sumner & R J Davies 217

Geological and geophysical interpretation of the Rio Grande Rise, south-eastern Brazilian margin: extensional tectonics and rifting of continental and oceanic crusts

W U Mohriak, M Nóbrega, M E Odegard, B S Gomes & W G Dickson 231

Self-consistent strain rate and heat flow modelling of lithospheric extension: application to Newfoundland-Iberia conjugate margins

A G Crosby, N J White, G R Edwards & D J Shillington 247

Variability in the crustal structure of the West Indian Continental Margin in the Northern Arabian Sea

R I Corfield, S Carmichael, J Bennett, S Akhter, M Fatimi & T Craig 257

Sedimentation styles and variability of organic matter types in the Triassic, non-marine half-grabens of west Argentina: implications for petroleum systems in rift basins

O López-Gamundí 267

Rifting of the South China Sea: new perspectives

A Cullen, P Reemst, G Henstra, S Gozzard & A Ray 273

Basin modelling of a transform margin setting: structural, thermal and hydrocarbon evolution of the Tano Basin, Ghana

L H Rüpke, D W Schmid, E H Hartz & B Martinsen 283

Dominance of lateral over axial sedimentary fill in dryland rift basins

A M Fordham, C P North, A J Hartley, S G Archer & G L Warwick 299

Petroleum Geoscience (ISSN 1354-0793) is published in February, May, August and November by the Geological Society Publishing House for the Geological Society, London and the European Association of Geoscientists and Engineers.

Subscription rates 2010 (volume 16, 4 parts) All correspondence relating to trade subscriptions should be addressed to the Journal Subscription Department, Geological Society Publishing House, Unit 7, Brassmill Enterprise Centre, Brassmill Lane, Bath, UK, BA1 3JN (Tel: +44 (0) 1225 445046; Fax: +44 (0) 1225 442836; e-mail: sales@geolsoc.org.uk). The subscription prices for 2010 to institutions and non-fellows is PG Online £350.75 (UK/EU), £350/\$700 (overseas); PG Online + print £365.76 (UK/EU), 368/\$735 (overseas). Single issue prices is £95. More information can be found on <http://www.geolsoc.org.uk/LyellCollection>.

Periodical postage paid at Middlesex, N.J. *Postmaster*: send address changes to *Petroleum Geoscience*, The Geological Society, c/o Pronto Mailers, PO Box 177, Middlesex, NJ 08846.

Cover illustration: View of the ocean–continent transition exposed in the peaks of Piz Oscar and Piz Nair in the Tasna nappe (Engadine window, Graubünden, SE Switzerland). This spectacular structure, first described by Florineth & Froitzheim (1994), preserves the transition from a thinned continental crust to an exhumed subcontinental mantle undisturbed by later Alpine deformation. (Florineth, D. & Froitzheim, N. 1994. Transition from continental to oceanic basement in the Tasna nappe (Engadine window, Graubünden, Switzerland): evidence for Early Cretaceous opening of the Valais ocean. *Schweizerische Mineralogische und Petrographische Mitteilungen*, **74**, 437–448.) The photograph was taken by Richard Corfield.
