CONTENTS – Volume 22, No 1

Thematic set: Geomodel uncertainty
Guest editors: M Brettle & A Sims

Modelling for comfort?
M Bentley

Application of experimental design to estimate hydrocarbons initially in place
C E Imrie & E J Macrae

Volumetric and dynamic uncertainty modelling in Block 22, offshore Trinidad and Tobago
R N Kimber, M D Curtis, F O Boundy, P H Diamond & A O Uwaga

Goldeneye: modelling a depleted field for carbon capture – how much uncertainty is left?
J D Marshall, O D Tucker & C E Lovelock

Resolving complex communication beyond geological and geophysical data resolution: an example from an underground gas storage facility in the Austrian Molasse Basin
G Thürschmid, A Harrer, W Gruber & B Griess

The palaeo-bathymetry of base Aptian salt deposition on the northern Angolan rifted margin: constraints from flexural back-stripping and reverse post-break-up thermal subsidence modelling
L Cowie, R M Angelo, N J Kusznir, G Manatschal & B Horn

Algal-microbial carbonates of the Namibe Basin (Albian, Angola): implications for microbial carbonate mound development in the South Atlantic
S Schröder, A Ibekwe, M Saunders, R Dixon & A Fisher

The characteristics of open fractures in carbonate reservoirs and their impact on fluid flow: a discussion
O P Wennberg, G Casini, S Jonoud & D C P Peacock

Century One Publishing Ltd, Alban Row, 27–31 Verulam Road, St Albans AL3 4DG

Petroleum Geoscience (ISSN 1354-0793) is published in February, May, August and November by the Geological Society Publishing House for the Geological Society, London and the European Association of Geoscientists and Engineers.

Subscription rates 2016 (volume 22, 4 parts)
All correspondence relating to trade subscriptions should be addressed to the Journal Subscription Department, Geological Society Publishing House, Unit 7, Brassmill Enterprise Centre, Brassmill Lane, Bath, UK, BA1 3JN (Tel: +44 (0) 1225 445046; Fax: +44 (0) 1225 442836; e-mail: sales@geolsoc.org.uk). The subscription prices for 2016 to institutions and non-fellows is £528.00 (UK/EU), £621.05 (UK/EU), £529.00/$1058.00 (overseas). More information can be found on http://www.geolsoc.org.uk/LyellCollection.

Cover image
The cover image is an early sketch propounding the simple idea of scenario-based reservoir modelling and simulation for quantitative uncertainty-handling. It illustrates the idea of modelling discrete alternative futures (‘scenarios’) as an alternative to the statistical combination of parameters. The scenario-based approach is inherently non-statistical, but benefits from dependency and transparency. (Bentley, M. 2016. Modelling for comfort? Petroleum Geoscience, 22, 3-10.)
